General advice	Show this safety data sheet to the doctor in attendance.
Inhalation	Move to fresh air in case of accidental inhalation of vapors. Keep patient warm. In case of
	shortness of breath, give oxygen. Apply artificial respiration only if patient is not breathing
	or under medical supervision. No artificial aspiration mouth to mouth or mouth to nose.
	Use suitable instruments/apparatus.
Skin contact	Remove contaminated clothing and immediately wash out with plenty of water at least 15
	minutes. Treatment of skin exposures with calcium gluconate gel (2,5%) until the pain
	subsides or soaked with 10% calcium gluconate solution if not available for calcium
	gluconate gel (2.5%). Obtain medical attention.
Eye contact	If the substance has got into the eyes, immediately wash out with plenty of water at least
	15 minutes. Obtain medical attention.
Ingestion	Rinse mouth. Do not induce vomiting; add calcium gluconate, calcium lactate, 1% calcium
	gluconate solution or milk. Keep patient warm. In case of shortness of breath, give
	oxygen. Apply artificial respiration only if patient is not breathing or under medical
	supervision. No artificial aspiration mouth to mouth or mouth to nose. Use suitable

Evacuate personnel to safe areas. Do not breathe vapors or spray mist. Wear a positive-pressure supplied-air respirator, flame retardant antistatic protective clothing. Shut off leaks if without risk. Keep people away from and upwind of spill/leak.

## 6.2 Environmental precautions

Contain or absorb leaking liquid with inert absorbent material, consults an expert. Prevent liquid entering sewers, basements and workpits. If substance has entered a water course or sewer or contaminated soil, advise police.

#### 6.3 Methods and materials for containment and cleaning up

Spillage: soak up with inert absorbent material. Prevent liquid entering sewers, basements and workpits. Transfer to covered drums. Dispose of promptly.

## 6.4 Reference to other sections

For disposal see Section 13.

## **SECTION 7: Handling and storage**

# **SECTION 13: Disposal considerations**

## 13.1 Waste treatment methods

#### **Product**

There are no uniform EC Regulations for the disposal of chemicals or residues. Chemical residues generally count as special waste. The disposal of the latter is regulated in the EC member countries through corresponding law and regulations. We recommend that you contact either the authorities in charge or approved waste disposal companies which will advise you on how to dispose of special waste or burn in a chemical incinerator equipped with an afterburner and scrubber but exert extra care in igniting as this material is highly flammable. Observe all federal, state, and local environmental regulations.

## Contaminated packaging

Disposal in compliance with official regulations. Handle contaminated packaging as hazardous waste in the same way of the substance itself. If not officially specified differently, non-contaminated packaging may be treated like household waste or recycled.
